

**Hambleside Danelaw Ltd
Press release – 20 May 2010**

Hambleside Danelaw announce CPD tour dates to promote GRP roofing products

Hambleside Danelaw is hitting the road to extol the benefits of GRP roofing products to the building industry.

The Group is participating in the CPD RoadSeminar Tour throughout the UK with dates scheduled for the remainder of 2010. Architects, specifiers and contractors will be able to choose from four different Hambleside Danelaw presentations covering:

- the advantages of specifying GRP roofing systems
- the environmental benefits of choosing GRP
- how green roofs can suit larger as well as smaller projects
- GRP rooflights as the energy saving and low carbon choice.

The first set of seminars provides an overview of what can be achieved with GRP roofing systems and how they differ from alternative systems. They will include information on material safety; installation; new build and re-roofing; features and benefits of different roofing materials; requirements for heritage projects; case studies and considerations for the environment including water run-off.

Maximising recycling opportunities and minimising waste by choosing GRP will also heavily feature as elements of the Hambleside Danelaw presentations. The contents of the presentations have been given a RIBA seal of approval.

The CPD tour follows Hambleside's recent enhancement of its range of Dryseal GRP component based roofing systems for flat and low pitched roofs that come with the easy 'Fit and Finish' installation.

Promoted in partnership with RIBA, the seminars are being organised by the CPD Certification Service, meaning that the content of training courses, papers delivered at seminars and other educationally beneficial material conform to universally accepted Continuous Professional Development guidelines.

Robin Jeffery, Hambleside Danelaw's vice chairman, said: "Hambleside Danelaw is pleased to have the opportunity to explain the advantages of specifying GRP roofing products with their strong environmental credentials as a cost-effective solution in a period of economic uncertainty. Seminar attendees will learn how GRP is durable, safe and easy to install, environmentally efficient and sustainable at the same time as making a building look good."

The Hambleside seminars will be presented by Paul Jubb and the Group's appointed agent for Dryseal, Mike Billett, will be on hand to deal with inquiries immediately afterwards. The venues and dates for the CPD RoadSeminar Tour 2010 are:

- Newcastle June 10
- Plymouth June 22
- Bristol June 23
- London September 15
- Southampton September 30

More details on these events are on the website of the Construction CPD Certificate Service at: www.cpduk.co.uk. Further information on the content of the Hambleside Danelaw presentations will be made available at: www.hambleside-danelaw.co.uk.

Notes to editors

1. About Hambleside Danelaw

Multiple sustainability award winner Hambleside Danelaw Ltd manufactures low carbon Glass Reinforced Polyester (GRP) roofing products in Daventry and Inverness in the UK. The company's product range includes Dryseal roofing products for flat and low pitched roofs; Insulator and Contour rooflights and wall lights; and Danelaw flashings, roof and wall ventilation products. Its Dry Fix or mortarless solution to roofing and ventilation is increasingly being seen as the future of the roofing industry and it can now offer suppliers a complete 'dry roof'. An improved Dryseal range has been launched for 2010, while the new Insulator Rooflight Lighting Control System, which can reduce the need for artificial lighting inside a building by as much as 50%, recently won a Green Apple Award. Hambleside Danelaw has been investing for ten years in all areas of sustainability and many of our roofing and ventilation products feature recycled materials in their construction, a process which has been recognised by the Green Organisation and the Waste and Resources Action Programme (WRAP). In 2007, the Group was accredited with the Planet Positive mark by leading carbon solutions company dcarbon8 and an independent audit by dcarbon8 has found that Hambleside Danelaw has reduced its carbon footprint at its two UK factories by over 20%. Find out more at: www.hambleside-danelaw.co.uk.

2. About the CPD Certification Service

The CPD Certification Service is the independent body operating across all market sectors and in support of all professional institutions, bodies and societies. Its certified CPD 'quality mark' is a recognised symbol of quality assured training. The prime role of the CPD Certification Service is to certify that the content of training courses, papers delivered at conferences and other educationally beneficial material conforms to universally accepted CPD guidelines. Membership of the CPD Certification Service comprises public and private sector organisations seeking to provide certified CPD training, material and other educational activities to internal and external audiences. In addition, it acts as a central point of contact for professionals and their supporting institutes seeking the provision of acceptable CPD material and employers seeking structured and ongoing CPD for their employees. For more information, see: <http://www.cpduk.co.uk/index.html>.
