

HD 6000

Size to suit 600mm rafter centres.
 Universal panel ventilator for use over the insulation,
 positioned between rafter centres to ensure clear airway.

Unique design enables use on either below 15° or above
 15° roof pitch.

Achieves regulation opening requirements of 10,000mm²
 and 25,000mm² per metre.

Airflow: 16,000mm² per panel
 Length: 390mm, Width: 610mm, Depth 35mm
