

CPD SEMINAR; UNDERSTANDING ROOFLIGHTS LEVEL 1 - NBS AND OTHER SPECIFICATION REQUIREMENTS

Summary

The seminar is designed to follow the key requirements when specifying rooflights in the industrial building sector.

- Why it is important to specify rooflights
- Addresses the key performance requirements set out in NBS in the order they appear
- Sets out the key performance requirements in the Building Regulations both within NBS and outside NBS
- Covers other specification requirements such as sustainability
- Gives an overview of how rooflights can contribute to BREEAM

Designed to suit

Architects, Planning Professionals, Sustainability Professionals, Building Owners and Main Contractors.

RIBA, Core Curriculum

- Design and Building it: Design, construction, technology and engineering
- Climate: Sustainable architecture

Aims

- Using a step-by-step process, guide delegates through the process of correctly specifying rooflights
- Relate requirements to a relevant NBS Specification clause
- Expand on other requirements that are relevant to Building Regulations
- To demonstrate how these requirements relate to sustainability and introduce the potential to contribute to BREEAM
- Encourage attendance to Level 2 for a further detailed understanding of BREEAM requirements

Outcomes

- Understand why rooflight specification should be considered independently of the roof system specification
- Understand why it is important and how it relates to NBS clauses and Building Regulation requirements
- Understand further sustainability benefits including how GRP rooflights have the potential to contribute to BREEAM
- Understand the benefits and consequences of these choices
